

## Objective & Strategy

ESG Swiss Equities certificate invests in a financial and ESG criteria scored weighted index. The index tracks Swiss financially sound companies that generate investment performance and integrate corporate social responsibility, ethics and sustainability characteristics in order to have a long term positive environmental, social, governance (ESG) impact. It aims to be a reference by providing a specific solution that allows capital markets to redirect investment flows toward a more sustainable economy. Only companies with a financial and ESG score equal or above the median are eligible for inclusion in the ESG Swiss Equities Index. The dynamic strategy is based upon a synthetic notional investment allocation and reallocation in the Index Components following a specific and monitored process of eligibility defined by Vandaalen & Cie SA.

## Monthly Comment

In September, the ESG Swiss Equities certificate registered a performance of 3.79% compared to August's -2.69%. The certificate's benchmark, the Swiss Performance Index (SPI), performed positively at 1.43% against -0.03% in the previous month. Since the beginning of the year, the two baskets stand at 19.22% for the certificate and 24.45% for the benchmark. Since inception, cumulated performances are respectively at 12.01% and 32.54% (representing annualized performances of 3.22% and 8.18%) for annualized volatilities of 11.19% and 8.65%.

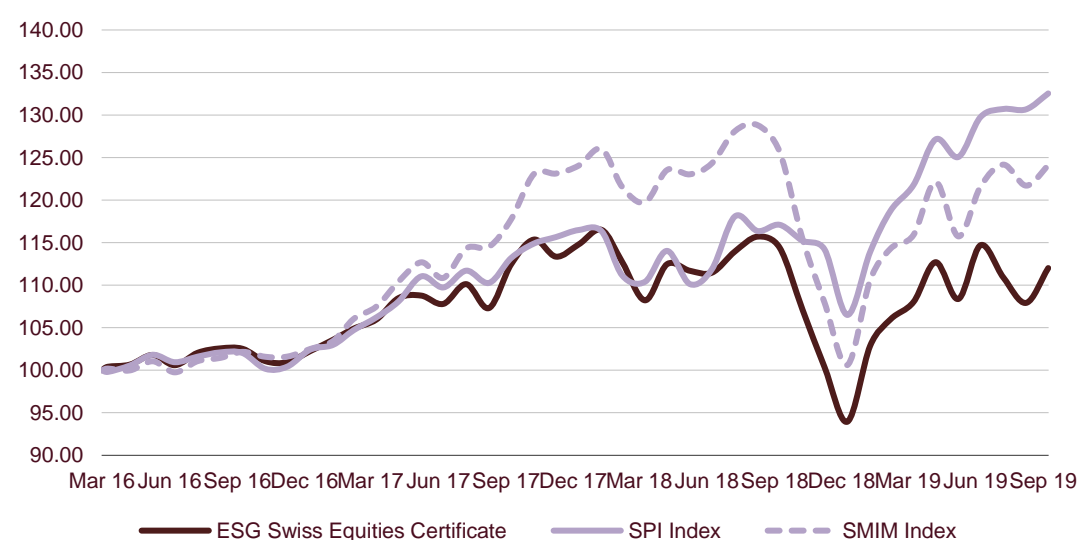

The portfolio's allocation in large capitalization companies remains around 23% against 9% in middle capitalization companies and 65% in small capitalization companies. In terms of sectoral allocation, industrials represent around 36%, health care companies account for 21%, followed by information technology companies at 14%.

Best contributors to the performance were Landis (10.29%, 0.55% contribution), Roche (6.60%, 0.48% contribution) and SFS (4.56%, 0.46% contribution). On the other side, DormaKaba (-3.59%, -0.14% contribution), Kardex (-0.72%, -0.03% contribution) and MobileZone (-0.1%, -0.004% contribution) were the main detractors.
