

Objective & Strategy

ESG Swiss Equities certificate invests in a financial and ESG criteria scored weighted index. The index tracks Swiss financially sound companies that generate investment performance and integrate corporate social responsibility, ethics and sustainability characteristics in order to have a long term positive environmental, social, governance (ESG) impact. It aims to be a reference by providing a specific solution that allows capital markets to redirect investment flows toward a more sustainable economy. Only companies with a financial and ESG score equal or above the median are eligible for inclusion in the ESG Swiss Equities Index. The dynamic strategy is based upon a synthetic notional investment allocation and reallocation in the Index Components following a specific and monitored process of eligibility defined by NextGen Wealth Managers SA.
